COURSE DESCRIPTIONS 2022-2023

Your high School education is the foundation for your college years and for your future. In order to reach your full potential, to achieve the very best you are capable of being, you must choose wisely:

"The easiest curriculum may be tempting in the present, but may be very costly in time, money, and frustration in the future."

~E. H. Jennings, Former President, The Ohio State University~

Selecting courses requires much planning. The decisions you make must be in your best interest; you must understand the consequences as well and the obligations of your curriculum choices. Choose what is best for your educational goals, not just to be with your friends, or a particular teacher.

****FAILURE TO READ THIS REGISTRATION BOOKLET DOES NOT EXCUSE A STUDENT FROM THE REQUIREMENTS DESCRIBED HEREIN.***

GRADUATION REQUIREMENTS

To graduate from Our Lady of the Elms High School, a student must complete four years of high school and earn **25 credits** in specified areas, which include Theology for every year the student is enrolled at the Elms. Credits for graduation must be earned in grades 9 - 12.

RECOMMENDED COLLEGE PREPARATORY SCHEDULE

The following course of studies is recommended for all students preparing for college. Courses marked with an asterisk (*) are required for graduation.

Each year, a student must have at least 6 course credits, 4 of which must be academics, and 7 periods of classes. Any student who only has 6 credits will be assigned to one study hall.

FRESHMAN SCHEDULE

*Theology and Service
*English
*Math
*Science
*Western Society
*World Language
*Health/P.E.
*Visual Art/Performing Art
*Study Skills / Information Management
*Speech (Schedule Permitting)
Optional Electives: Chamber Choir, Dance, Art I

JUNIOR SCHEDULE

*Theology and Service
*English
*Math
*AP US History
*Global Studies (Schedule Permitting)
*Science
*World Language plus ***2 - 3 Electives**

SOPHOMORE SCHEDULE

*Theology and Service
*English
*Math
*Science
*AP European History -or- Modern America
*World Language
*Health / P.E.
*Visual Art / Performing Art
***1 - 2 Electives**

SENIOR SCHEDULE

*Theology and Service
*English
*Math
*Government -or- AP Government
*[another 1 to 1 ½ credits in academics]
***2 - 3 Electives**

GRADUATION AND COLLEGE PREPARATORY RECOMMENDATIONS

<u>Subject</u>	<u>Graduation Requirement</u>	<u>Ideal College Preparatory Recommendation</u>
Theology & Service	4	4
English	4	4
Health / PE	1	1
**Independent Living	½	1/2
Mathematics	4	4
Science	3 (Lab Sciences)	4 [should include Chemistry & Physics]
Social Studies	3	3
Visual & Performing Arts	1	1
World Language	2	3 or 4
Electives	2	
*Information Technology	½	½
Information Management		
Acceptance to a 4-year College		
Total	25	

(State requirements are subject to change.)

PHYSICAL EDUCATION (PE) REQUIREMENT

According to the state of Ohio, .50 credit is required to graduate. Our Lady of the Elms requirement is .50 also. In order to earn these credits a student must take at least one PE course (.25) at Our Lady of the Elms. The other .25 credit may be earned by playing **the same varsity sport for at least 2 years**. For anyone not involved in sports the second PE class would be required.

*Information Technology is integrated into the curriculum. Students are required to complete the Study Skills/Information Management course. Students receive a "Pass" and .50 credit.

**Part of this course includes Personal Finance.

EXPECTATIONS OF AN HONORS STUDENT

- ✓ Maintains an A -or- B grade average
- ✓ Enjoys and appreciates literature
- ✓ Completes work of high quality on time and with consistency
- ✓ Participates regularly in small-group and full-class discussions
- ✓ Demonstrates skill in writing [with a willingness to strive for improvement]
- ✓ Accepts the challenges of an accelerated program without grumbling
- ✓ Maintains acceptable test scores
- ✓ Stays focused on the task at hand in class
- ✓ Budgets time well, especially with long-term projects
- ✓ Engages in variety of learning situations, including individual and cooperative modes
- ✓ Demonstrates excitement about learning in general.

STUDENT- INITIATED SCHEDULE CHANGES (please read carefully)

1. Changes in course request may be made until March 22, 2022. After that date, few changes will be made and the cost will be **\$15.00 per change until May 1st. After May 1st, the cost will be \$25.00 per change.**
2. All computer omission errors will be corrected prior to or immediately following the first day of school.
3. Schedule changes requiring the complete alteration of classes will not be made.
4. Students will **not** be admitted into a semester course after the third [3rd] full week that the course is in session.
5. Students will **not** be admitted into a year course after the third [3rd] full week that the course is in session.
6. **AFTER THE FIRST THREE [3] WEEKS OF ANY COURSE, REQUESTS FOR DROPPING WILL NOT BE HONORED. STUDENTS IN GRADES 10, 11 AND 12 WHO DROP A COURSE AFTER THAT TIME, WILL DROP IT AS A FAILURE. AN "F" WILL APPEAR ON THE REPORT CARD. THERE WILL BE A \$25.00 CHARGE FOR ANY SCHEDULE CHANGE, INCLUDING ADDING AN ADDITIONAL NON-REQUESTED COURSE OR DROPPING A REQUESTED COURSE.**
7. **POLICY FOR DROPPING A FULL YEAR COURSE**
Ordinarily yearlong classes may not be dropped at any time (after three weeks of school, the student drops with an "F"). However, since there may be some extenuating circumstances, the only reason for dropping an AP course or any yearlong class at semester break is **if a student is earning a "D" or lower in the class. A conference with the parent(s) and teacher will be required before the change occurs. A form signed by the parent and student will also be required. The cost for dropping any course which a student has requested is \$25.00.**
8. Schedules will be made available on Digital Academy in August **if the registration fee and July and August tuition payments have been received.**
9. Once a student passes a course, the grade(s) and credit(s) remain as is.
10. No student may drop or add a class without consulting with the Registrar.

DROPPING A SEMESTER CLASS

We reserve the right to check the number of people registered for the course you are requesting to drop. If there are too few remaining you will need to take the course. The teachers have prepared for the number of students who were enrolled in their course. They may have had the opportunity to teach a different course for other students.

NON-DISCRIMINATION STATEMENT

All of the courses and activities presented in this bulletin are open to all students, provided that they have met all established requirements.

SUMMER SCHOOL

Students may not take any required courses, other than P.E., in summer school. This includes any courses necessary for the academic awards. Summer School courses are recorded on the students' transcripts, but are not included in the GPA. The only exception to this is a Summer School course which is necessary because a student has failed a required class. In this instance, the Summer School grade for the failed class is included in the GPA, but does not erase the "F".

OHIO'S COLLEGE CREDIT PLUS (CCP) PROGRAM

See student handbook page 9-10.

ADVANCED PLACEMENT EXAM POLICY

1. Students in all AP Courses are required to take the AP exam for that course.
2. When you take the AP exam, your final grade is your Semester II grade. Students have the option of taking their final exam if they are not satisfied with their averaged grade. An exam is not recorded if an exam is not taken.
3. Students not enrolled in AP classes who desire to take an AP Exam may do so if they:
 - a. have A's in all quarters, including the last one -or-
 - b. are recommended for the exam by their teacher and the principal.

CREDIT FLEXIBILITY POLICY

Our Lady of the Elms High School seeks to provide the most appropriate learning experience for each student. In accordance with state policy, Our Lady of the Elms High School strives to do this by expanding opportunities for students to demonstrate mastery of knowledge or skills, by broadening the scope of curricular options, and by increasing the depth of study possible for a particular subject. The credit flexibility program permits students to earn high school credit in a variety of ways. This can be done through the completion of a course; testing out of a course or courses or demonstrating mastery of course content; or pursuing one or more alternative educational options, e.g., distance learning, educational travel, independent study, internship, tutorial program, or community service.

Legal References

Our Lady of the Elms High School has developed a credit flexibility plan consistent with: Carnegie Design Team Report to the State Board of Education, *New Emphasis on Learning: Ohio's plan for credit flexibility shifts the focus from "seat time" to performance.* (March, 2009)

Credit Flexibility Plan

The Credit Flexibility Program is available to any student who has at least a 2.0 GPA and is capable of completing the work outlined in a written Credit Flexibility Plan. A student may only work on one (1) credit flexibility course per semester. The credit flexibility plan does not supersede the graduation requirements for Our Lady of the Elms High School. Credit flexibility is not intended to replace courses offered at Our Lady of the Elms High School; it is meant to supplement our course offerings. The High School will not approve coursework or options that are inconsistent with the School's Catholic mission and philosophy. In addition, a Credit Flexibility Plan cannot change the fundamental nature or requirements of a course.

An interested student initiates the process by submitting a written proposal for credit flexibility to the designated school official. The designated school official will then meet with the student to develop the written Credit Flexibility Plan. The written Plan must be signed by the student, the student's parent(s) or guardian(s), a designated school official and the principal. If the need arises, the Credit Flexibility Plan can be revised and/or modified, and this revised/modified Plan must be signed by the designated school personnel, the student and the student's parent(s) or guardian(s).

Procedures

Students participating in an off-site activity related to an educational option (e.g., while participating in an internship or mentorship at a business or other local institution) must submit a liability waiver signed by her parent(s) or legal guardian before approval is granted.

Students with disabilities shall not be excluded from opportunities to earn credit through educational options or by demonstrations of mastery. Accommodations and supports for student with disabilities participating in educational options and online courses shall be provided in compliance with the student's accommodation plan.

Our Lady of the Elms High School reserves the right to reassign a student participating in an educational option to a traditional course or other placement at its discretion if the student fails to meet the standard for ongoing participation and satisfactory progress described in her educational options plan.

Students are responsible for any costs associated with the personalized learning plan including assessment and transportation fees.

The credit to be awarded is the decision of Our Lady of the Elms High School. The Elms retains the right and responsibility to determine what counts as curricular content, learning outcomes, methods of learning, assessment and criteria for assigning grades, all of which are to be addressed in the written Credit Flexibility Plan. Credit will be full or partial and may be for more than one content/course area. Credit will be determined based on credit equivalency for the Carnegie unit, which is one credit per 120 hours of course instruction and 150 hours for laboratory courses. All credit assigned to a student must be awarded by a teacher of record who is in possession of a State approved license or certificate.

Grading, Grade Point Average and Transcripts

The written Credit Flexibility Plan will stipulate the way progress will be monitored and proficiency measured. Unless otherwise specified, the student's grade will be reported the same as for a student taking a similar course in a traditional classroom setting. The grade will be calculated in the Grade Point Average (GPA) the same as for a student taking the same or a similar course in a traditional classroom setting. The credits earned will appear on the transcript like all other courses for which credit was earned. Student earning credit through the Credit Flexibility Plan will not be permitted to graduate early. If the pass/fail option is utilized, there is no grade included in the GPA.

Athletic Eligibility

A student interested in participation in high school interscholastic athletics and/or intercollegiate athletics must discuss eligibility requirement with her parent(s) or guardian(s) and school officials. The written Credit Flexibility Plan should contain the mechanisms to meet OHSAA and/or NCAA eligibility requirements.

Additional information about athletic eligibility see:

- <http://www.ohsaa.org/eligibility/default.asp>
- <http://www.ncaa.com>

Appeal Process

A student may present a proposal for a Credit Flexibility Plan that is denied. Such a student may invoke the appeals process outlined below:

- a. Within **7 school days**, the parent(s) or guardian(s) will send a letter to the Credit Flexibility Plan Committee, of which the principal will not be a member, outlining the specific issues relative to the appeal.
- b. Within **7 school days**, the Credit Flexibility Plan Committee will respond in writing to the appeal.
- c. If the parent(s) or guardian(s) and student wish to appeal the decision of the Credit Flexibility Plan Committee, they will submit their appeal to the principal within **7 school days** of the written response from the Credit Flexibility Plan Committee. The principal will respond in writing within **7 school days** of receiving the appeal. The principal's decision will be final.

Communication

The Office of Catholic Education and each diocesan high school acknowledge the value of the Credit Flexibility Program in providing additional opportunities for students to enhance their learning experience. Therefore, the program details and policies related participating in the program will be communicated to students and parents through the following methods:

- the website of each diocesan high school
- the course description booklet of each high school [2020 – 2021]

Data Collection and Reporting

The principal or his/her designee(s) shall develop and implement procedures for monitoring and annually reporting to the Ohio Department of Education data regarding:

- methods and frequency of communicating credit flexibility information to students and parents
- the number of students participating in educational options and earning credit based on demonstration of mastery
- the total number of credits earned by student through successful completion of educational options and demonstrations of mastery
- the extent to which student participation in flexible credit options reflects the diversity of the student body as a whole

Fees

There is a non-refundable application fee of \$25.00 per course and a course supervision fee of \$100.00 per course. These fees must be paid to Our Lady of the Elms High School

THEOLOGY DEPARTMENT

The Theology Department of Our Lady of the Elms School is rooted in the Dominican tradition of truth, justice, and peace. In addition to teaching Catholic doctrine according to diocesan guidelines, the department seeks to equip young women to become credible witnesses for faith in an increasingly faithless world. In nurturing this faith, the department's goal is to inspire young women to transform their lives to become more like Jesus.

The document *Doctrinal Elements of a Curriculum Framework for the Development of Catechetical Materials for Young People of High School Age* was developed by a Committee of Bishops in November, 2007. The curriculum framework presents a new sequence of course content which details six **Core Curriculum courses** and electives for the senior year.

Because Christian Service is seen as an essential element in the student's faith development, each student in Grades 6 through 12 is required to participate in the service program as outlined by the Theology Department. Attendance at the annual retreat is obligatory for grades 6-11. Grade 12 retreat is optional, but students must be in school if they do not attend retreat. Seniors who do not attend retreat will be required to perform 15 additional hours of service.

THEOLOGY 9

Each course is a semester course and earns ½ credit.

CORE I – REVELATION and THE OLD TESTAMENT: This course provides students with a general knowledge and appreciation of the Sacred Scriptures while they encounter Jesus. In the course they will learn about the Bible, authorized by God through Inspiration, and its value to people throughout the world. The students will learn how to understand the literary forms within the Bible and will become familiar with the major sections of the Bible and the books included in each section.

CORE II – JESUS CHRIST and THE NEW TESTAMENT: This course introduces students to the Mystery of Jesus Christ, the Living word of God, the second Person of the Blessed Trinity. This course leads students toward a deeper understanding of Divine Revelation, the Trinity, the Incarnation, Jesus, salvation, and discipleship as a response to God's love.

THEOLOGY 10

CORE III – THE PASCHAL MYSTERY and the Gospels: This course leads students toward a deeper understanding of our need for redemption and how Jesus is the fulfillment of God's promise of redemption. The course explores how, through his suffering, death, Resurrection and Ascension, Jesus makes our redemption possible. This course also addresses how we continually experience the Paschal Mystery in our lives and the liturgy of the Church. Building on the core courses of freshman year, this course provides students with an extensive understanding of Christology. (Cutarelli, Rita, and Carrie Schroeder. "Introducing The Paschal Mystery: *Christ's Mission of Salvation.*" Introduction. The Paschal Mystery: Christ's Mission of Salvation. Winona, MN: Saint Mary's 2011. 8. Print).

CORE IV – THE CHURCH Foundations and Mission: This course leads students towards a deeper understanding of the Church as the means of encountering the living Christ. It explores the origin, human and divine elements, and the ongoing mission of the Church. Additionally, students will explore the Church's ongoing efforts to gather all into the People of God through the ecumenical movement and interreligious dialogue. Students will reflect on their role in the Church and Christ's invitation to actively participate in and contribute to the life of the Church. (Herrick, Anne T., Rick Keller-Scholz, and Ann Marie Lustig. "Introducing The Church: Christ in the World Today." Introduction. *The Church: Christ in the World Today.* Winona, MN: Saint Mary's, 2011.8.Print.)

THEOLOGY 11

CORE V – SACRAMENTS and the Gospels: ENCOUNTERS WITH CHRIST: This course helps students understand that they can encounter Christ today in a full and real way. The focus of this course is to help the students to learn about the Seven Sacraments, especially the Eucharist, in order to enable them to more fully participate in them. The course also explores the history, scriptural foundation, and current practices of the sacraments.

CORE VI – CHRISTIAN MORALITY and God's Love: This course addresses how a relationship with Christ and the Church can lead to choices that are in accord with God's plan. The students learn what it means to live as a disciple of Christ and how the Church strengthens the discipleship.

THEOLOGY 12

CATHOLIC SOCIAL TEACHING: Christian Life in Society: This course is based on the U.S. Catholic bishops statement in *Sharing Catholic Social Teaching*: "We need...to ensure that every Catholic understands how the Gospel and church teaching call us to choose life, to serve the least among us, to hunger and thirst for justice, and to be peacemakers. The sharing of our social tradition is a defining measure of Catholic education and formation." To that end, this course seeks to form students who not only know how the Scriptures and Catholic social tradition is a defining measure of Catholic education and formation." To that end, this course seeks to form students who not only know how the Scriptures and Catholic social teaching call them to justice, but who possess the ability and desire to respond to that call in their daily life. The goals of this course are to: 1) Immerse students in God's vision of justice and to help them find God in their pursuit of justice, 2) Foster students' sense of compassion for those who suffer from injustice 3) Enable students to critically examine society according to the criteria for justice 4) Inspire students to act for justice.

WORLD RELIGIONS, AND FAITH AND THE COLLEGE STUDENT: This course is designed to help second semester seniors make the transition to college and beyond. The first portion of the course offers students the opportunity to develop an authentic understanding of the place of religion in the lives of their neighbors, as well as a deeper commitment to their own faith tradition. Students learn the beliefs, teachings, traditions and practices of the world's religions through a Catholic lens.

In an increasingly interconnected world, people of different faiths are morally obligated to try to understand each other and to learn how to speak with one another, as we create a more peaceful world.

This course encourages students to articulate Catholic beliefs, and to continue to journey as reflective, creative and critical thinkers, which leads to a deeper understanding of their relationship with God and neighbor.

The course will culminate in addressing some of the unique challenges of living out the Christian faith as a college student. In addition, students will reflect upon how they will make a difference as graduates of a Dominican high school.

OUR LADY OF THE ELMS SERVICE PROGRAM REQUIREMENTS – GRADES 9-12

Jesus calls us to love as He loved. This high calling is communicated clearly in Scripture. Our Lady of the Elms school believes that service to others is at the heart of a Christian way of life. Because of this, our Service Program is an essential element of the OLE curriculum.

Service hours are to be completed over a twelve month period beginning May 1. Part of your hours will be completed by the end of S2, the remaining hours and a Theological Reflection paper will be completed and turned in on, or before, May 1.

Service hours should be performed at non-profit organizations such as public service agencies, environmental groups, and places of worship. Students should also consider the many volunteer opportunities at Our Lady of the Elms such as, Open Houses, February Fantasy and Seventh Grade Visitation, to name a few.

You must complete a number of your service hours by the end of S1 or points will be deducted from your S1 Theology grade.

Grades 9 & 10 = 10 hours (20 points)

Grades 11 & 12 = 15 hours (30 points)

By May 1 you will complete the remaining hours for the following totals:

Grades 9 & 10 – remaining 15 hours for a total of 25 hours (30 points)

Grades 11 & 12 –remaining 20 hours for a total of 35 hours. (40 points) **10 of these hours must be done at an agency that provides “hands on” service with the poor or needy.**

Please note, there are no longer any limitations on the number of hours you may complete at either school or church.

The **Service Log** is to be completed with the number of hours and the signatures from the agency confirming student service hours, including those completed at Our Lady of the Elms.

The **Theological Reflection Paper** must be completed following the rubric provided by your theology teacher. It will be graded according to the Elms grading scale and incorporated into the Q4 Theology grade.

Turning in any portion of the requirements late will result in an **8% deduction per day**. Theological Reflection Papers will only be accepted up to **3 days late**, or result in a failing grade which will be added to your S2 Theology grade.

The fulfillment of both the service documentation and the theological reflection paper are **required both to pass to the next grade level and to graduate from Our Lady of the Elms.**

All Service Hour paperwork and forms can be found online in the Documents section of your theology class in Digital Academy.

ENGLISH DEPARTMENT

In conjunction with the present method of teaching college English, the aim of the Elms English Department is to teach composition and literature as process. To that end, all students are required to learn the structure and terminology unique to each genre so that they might become competent and perceptive writers and discriminating and appreciative readers. At every level, skills in spelling, punctuation, grammar, outlining and vocabulary are developed.

*Honors Courses are offered at all levels. (See criteria for placement in English Honors - page 4).

TRADITIONAL CURRICULUM – Required courses

ENGLISH I (one credit; grade 9) COMPOSITION: Sentence structure and paragraph development culminate in the descriptive, expository and analytical essay forms. **LITERATURE:** Genres explored are the short story, lyric and narrative poetry, Shakespearean drama, the novel and non-fiction.

ENGLISH II (one credit; grade 10) American Literature COMPOSITION: Essays emphasize literature analysis, with a focus on comparison/contrast composition. Students are introduced to research methods, culminating in the completion of a term paper. **LITERATURE:** Classics of American fiction, drama, poetry and nonfiction are studied.

ENGLISH III (one credit; grade 11) British Literature-COMPOSITION: Writing assignments include both literary analysis and research writing. Other assignments may include creative writing, visual arts projects, performance options, and integrated technology pieces. A research paper is also required; students select from a wide range of topics connected to the United Kingdom. **LITERATURE:** Students read the classics of British fiction and non-fiction.

ENGLISH IV (one credit; grade 12) World Literature - COMPOSITION: Writing assignments include the college essay, literary analysis essays, timed writings and the research paper. Creative writing involves journals and modeling poetry or short stories. **LITERATURE:** Students read a wide variety of world literature including the genres of fiction, drama, poetry and nonfiction.

ENGLISH ELECTIVES

ADVANCED PLACEMENT ENGLISH LITERATURE (one credit; grade 12): This course's curriculum recognizes no geographical boundaries; an anthology in world literature is used merely as a supplement to the over twenty masterpieces covered - plays, novels, short stories, poetry, and non-fiction. Because it is taught on a college level in the senior year, students admitted to this course of studies must be willing to read at a much faster pace and to write many more compositions. Genius is not a prerequisite; diligence is.

ADVANCED SPEECH: FORENSICS PRACTICUM (one-half credit; grades 11-12): Advanced Speech further develops communication techniques through oratory, debate, oral interpretation, acting, and extemporaneous speaking. Students must practice and compete extensively during the Ohio High School Speech League season. Final evaluation of ballots and coach's critiques document the student's growth.

-Teacher recommendation is required.

GRAMMAR AND COMPOSITION: (one-half credit; grades 10-12): This semester course will immerse the student in the world of grammar and writing. The first quarter will focus on parts of speech and rules of syntax. The second quarter provides opportunities to understand complex grammatical concepts, craft eloquent sentences, and develop organized paragraphs. This elective course is designed for any student in grades nine through twelve who seeks to improve her writing skills or who simply enjoys writing and all its components.

-Minimum number of students - 10

-Course offered depending on teacher availability.

SPEECH (one-half credit; grades 9-12): This is a semester course providing public speaking experience. Technique and theory are explored. In addition to six major speeches, units on listening, delivery and persuasive speaking are highlighted. May be used for Performing Arts credit.

-Minimum number of students - 8, maximum - 16

FILM HISTORY AND APPRECIATION (one-half credit; grades 11-12): Students will explore the invention and development of an artistic medium that continues to define and reflect humanity. Students who are passionate about all genres of film will trace the history of cinema, from the silent years to the present era of globalization and digital technology. Drama, comedy, documentary, animated and experimental films will be studied in order to recognize the powerful impact of this ever-changing platform for self-expression. Students will recognize the prominent inventors, technicians, designers, directors, cinematographers, producers, and actors who have influenced film history.

-Scheduling depends on the availability of teacher.

NATURE LITERATURE AND WRITING (one-half credit; grades 11-12): This semester elective course will introduce students to nature/environmental literature and the styles of writing found within the genre. Students will have the opportunity to read poetry, short fiction, novels, and even children's literature about nature and the environment; creative nonfiction, such as travel and adventure writing, nature observation and nature journals, and science writing will also be examined. Writing assignments will include reading reflections and analysis, nature journaling, the writing of a children's story, and poetry. All course texts focus on the natural world and humans' relationships with it.

ENGLISH DEPARTMENT REQUIREMENTS

Criteria for placement in English Honors

- B average (90% in previous English class)
- Recommendation of current English teacher

Criteria for remaining in English Honors

- A "D" in an honors English class for any grading period may be cause to move a student to the college prep English class.
- A "D" in an honors English class for any two grading periods is grounds for immediate dismissal from the honors program.

This decision is the responsibility of the school. This move may take place at the end of either semester.

Criteria for placement in AP Literature

Advanced Placement Literature is a college-level course; thus, students must meet more stringent requirements. Admittance to this class is based on the following criteria:

- Recommendation of the student's current teacher
- A verbal score of at least 85% on the PSAT
- A rating of at least 90% in previous Honors English classes
- The approval of the Advanced Placement teacher

A candidate for AP English will also submit three pieces of analytical writing from her British Literature class based on one novel, one drama, and an in-class analysis of a poem. These selections should be given to the AP teacher before the end of third quarter.

Finally, the size of this class will be determined solely by the English Department faculty in conjunction with the administration.

MATHEMATICS DEPARTMENT

Each individual must accept responsibility to use her God-given abilities to upgrade the quality of life in the world. Mathematics makes major contributions to this end and all people must have some facility with mathematics in order to contribute to the betterment of society.

In order that each student has an opportunity to develop all aspects of cognitive development, she is exposed to mathematical thinking and structure. This exposure is intended to stimulate creative, independent thought and action. We hope that students will also enjoy mathematics, and therefore the student must experience success in mathematics. Every effort is made to formulate programs of instruction that will make success possible, since we feel the learning process is as important in the student's development as the content itself. The student can also gain from the mathematics program skills that will benefit her in day-to-day living situations as well as in providing the background necessary for a variety of careers.

Any student entering Our Lady of the Elms High School is expected to take the appropriate Placement Examination(s) to assist the Mathematics Department in formulating the appropriate courses of study for each student. **Students need 4 credits in Mathematics in High School [grades 9 - 12] to graduate.**

Fundamentals of Algebra (one credit: grade 9): Fundamentals of Algebra addresses the needs of a small number of incoming freshmen who have a demonstrative need to solidify their mathematical skills to be successful in Algebra. The first semester solidifies basic operations of arithmetic, emphasizing the acquisition of computational skills, working with data and graphs, problem solving and application of percentages, decimals and fractions and fundamental algebraic evaluations. Second semester introduces the properties of the real number system and uses these properties in solving and graphing linear equations and inequalities in 1 or 2 variables, exploring exponents and polynomials and factoring.

-Required equipment: Scientific Calculator

ALGEBRA I (one credit; grade 9): Algebra I introduces the properties of the real number system and their applications with algebraic expressions and equations. Topics covered in the first semester include solving and graphing equations and inequalities, linear functions, arithmetic sequences, and systems of equations and inequalities. Patterns, logics, and problem solving strategies with real world applications are used throughout the year with an emphasis on mathematical language. Second semester topics focus on exponents and exponential functions, geometric sequences, polynomials and factoring, quadratic functions, solving quadratic equations, working with functions, calculating with radicals, and rational expressions. Basic graphing calculator usage is taught throughout the year.

-Required equipment: Scientific Calculator

GEOMETRY (one credit; grades 9-11): This course includes the study of basic, plane and solid geometry and the different types of proofs. Algebraic skills are reviewed and strengthened through application in geometric problems. Basic trigonometry, coordinate geometry and transformations are also introduced.

-Prerequisite: Algebra I

-Required equipment: Scientific Calculator

ALGEBRA II/TRIGONOMETRY (one credit; grades 10-12): This course includes modeling using algebra, real numbers, complex numbers, linear functions, exponential functions, logarithmic functions, quadratic functions, systems of equations and inequalities, radical functions, polynomial and rational functions, rational expressions, analytic geometry and trigonometry.

Completion of Algebra II makes possible entry into Probability Statistics or Pre-calculus (with teacher recommendation).

-Prerequisite: Geometry

-Required equipment: TI-84 Calculator

ALGEBRA II/TRIGONOMETRY HONORS (one credit; grades 10-11): This is a course designed to challenge advanced math students. The topics included in the Algebra II course are studied to a greater depth.

-Prerequisite: Geometry

-Teacher recommendation required

-Required equipment: TI-84 Calculator

PROBABILITY-STATISTICS (one credit; grades 11-12): This course introduces basic probability theory and applied statistics, concepts found in college-level mathematics, science and business courses.

-Prerequisite: Algebra II/Trigonometry

-Required equipment: TI-84 Calculator

PRECALCULUS (one credit; grades 10-12): This course covers the algebraic, exponential, logarithmic, and trigonometric functions and their graphs. Advanced algebra topics involving functions and the use of graphing technology are emphasized in preparation for a course in calculus.

-Prerequisite: Algebra II/Trigonometry

-Teacher recommendation required

-Required equipment: TI-84 Calculator

AP CALCULUS AB (one credit; grade 12): This course covers differential and integral calculus topics typically included in an introductory Calculus college course. Both theory and application problems are emphasized by completing the required topics set forth by the College Board. Students will take the AP Calculus AB exam.

-Prerequisite: Pre-calculus.

-Required equipment: TI-84 Calculator

AP CALCULUS BC (one credit; grade 12): This course covers differential and integral calculus topics, as well as sequences and series, typically included in introductory Calculus college courses. The topics covered in AP Calculus AB will be explored more in depth and expanded on. Both theory and application problems are emphasized by completing the required topics set forth by the College Board. Students will take the AP Calculus BC exam.

-Prerequisite: AP Calculus AB

-Required equipment: TI-84 Calculator

AP Statistics (one credit; grades 10-12): Students will become proficient in the major concepts and tools for collecting, analyzing and drawing conclusions from data. The four broad conceptual themes are: exploring data, sampling and experimentation, anticipating patterns, and statistical inference. Students will be prepared to take the AP test in May.

-Prerequisite: Algebra II/Trigonometry

-Required Materials: TI-84 Calculator & Online Access

Algebra III (one credit; grade 12 only): This course integrates fundamental topics from previous courses (Geometry, Algebra, Trigonometry, Statistics) to prepare the student for credit-bearing college mathematics. Students will use critical thinking skills and problem solving techniques to see how mathematics applies to their lives and solves authentic problems. Test taking strategies taught will help the student succeed on college placement exams. Topics studied include number and set theory, functions (linear and beyond), geometric figures and trigonometry, counting theory and probability, and basic statistics.

-Teacher Recommendation Required

-Required equipment: Scientific or TI-84 Calculator

MATHEMATICS DEPARTMENT REQUIREMENTS

Required Courses

- Algebra I
- Geometry
- Algebra II / Trigonometry

Electives

- Algebra II / Trigonometry Honors
- Probability - Statistics
- Precalculus
- AP Calculus
- AP Statistics
- Algebra III

HEALTH & PHYSICAL EDUCATION

Our call as Christians to be stewards of creation includes the responsibility of attending to our individual health and well-being. It is appropriate and essential to care for our bodies, as well as our minds and our emotions.

A major theme of Catholic social teaching carries the responsibility to care for the health and well-being of not only ourselves but of others. The concept of wellness is a core principle of health and physical education. The development of our physical well-being both individually and in tandem with others is our responsibility as temples of the Holy Spirit.

Acknowledging our individual limitations, we must be patient with our own development and with that of other mental, emotional, physical and social aspects of living necessary for a happy, healthy, and productive life. It is expected that students will make healthy choices related to health and fitness both within school and as life-long learners and caretakers of their physical, mental, emotional, and spiritual health.

The Life Skills Program at Our Lady of the Elms is designed to assist students in the development of attitudes, understandings and abilities necessary for achieving personal and family living.

Today's changing society makes great demands on women by requiring them to master the techniques of managing a home, to contribute to the financial welfare of the family and to participate in community life. This program emphasizes basic techniques and skills which will prepare students for these multiple roles, enhancing their contribution to society.

Life Skills offers a variety of practical and challenging learning experiences in an environment conducive to independent thinking and the development of creativity. Students are directed toward forming concepts and developing the competencies necessary to make intelligent choices. They will be able to apply these principles to new situations throughout their adult lives.

HEALTH (one-half credit; grades 9 or 10): Health Education empowers each student to make informed decisions concerning her physical, social, mental, emotional, and spiritual health. The course covers a comprehensive curriculum of current and relevant health issues. Subject matter includes: 1) The foundations of well-being: proper sleep, exercise, and nutrition. 2) Refusal skills and conflict management. 3) Dating violence prevention, tobacco, alcohol and drug abuse and prevention, and prescription opioid abuse prevention. 4) Mental health/stress management. Students will learn how to advocate for their health and the health of their peers and family by applying life skills. Life skills include assessing health, effective communication, using refusal skills, coping, evaluating media messages, being a wise consumer, using community resources effectively, making great decisions, setting goals and practicing wellness.

Formatted: Highlight

PHYSICAL EDUCATION (one-fourth credit; grades 9-12): Physical Education enables each student to develop an understanding of the importance of an active lifestyle versus a sedentary lifestyle; thus promoting a lifelong interest in maintaining health, and achieving optimal wellness now and post graduation. ~~The class takes place~~The students explore movement in our fitness center, dance room and gymnasium. In the fitness center, students utilize the cardiovascular ~~equipment~~machines, weight machines and free weights ~~to enhance~~ enhancing their 5 components of fitness. In the dance studio, students practice yoga, experiencing the emotional, mental and physical benefits of exercise. In the gym, the students participate in individual sports, dual and team sports, circuit training and lifetime

recreational activities. Students are expected to demonstrate proper etiquette and sportsmanship.

Summer gym option is available.

-Two semesters are required, usually taken in the freshman and sophomore years.

INDEPENDENT LIVING (one-half credit; grades 11-12): This course will cover topics which will prepare the student for living away from home with its many challenges, building their confidence and providing basic financial skills for independence. Semester topics include: career planning, budgeting, paying taxes, saving, debt, consumer awareness, insurance and investing. Class will consist of lecture, discussion textbook use, current events, video and internet resources, and research activities. Stress will be placed on practical and personal finance skills.

-This is a required class

-Minimum number of students - 6

-Required equipment: Scientific Calculator

SCIENCE DEPARTMENT

Science Education at Our Lady of the Elms High School is designed to help each young woman to learn the fundamental principles and concepts of each course she pursues so that she may better understand the world and the universe.

It strives to encourage the student to explore the sciences, and to see the relatedness of the various branches of science.

It also endeavors to widen the horizons of the Elms student by making her aware of world and community problems and the power of science to help with the solutions to these problems.

The study of science aids in the development of values through the examination of the order of the universe, and provides a clearer understanding of the reason for one's existence.

SCIENCE FUNDAMENTALS (one half credit; grade 9): Science Fundamentals is a course paired with Algebra Fundamentals to help students improve basic skills. This course will focus on how to read science texts, take notes in nonfiction work, graphing and how to interpret and understand what the graphs are telling us. The students will learn to convert units using the metric system, run experiments, write research and practice the reading of scientific material.

-Registration is determined by placement test

BIOLOGY (one year; one credit) grades 9-10): This year-long, laboratory course covers four main themes: heredity, evolution, diversity and the interdependence of life, and cells. Topics covered in class include Mendelian genetics, macroevolution and microevolution concepts, taxonomy, the five kingdoms, mitosis and meiosis, energy systems, cell structure and function, macromolecules and ecology.

-This is a freshman or sophomore required class.

-Entrance as a freshman is based on a placement test and recommendation

BIOLOGY HONORS (one year; one credit; grades 9-10): This year-long, laboratory course covers topics typically covered in a high school biology course and prepares students for Advanced Placement Biology. Students study the structures, functions, and processes of living organisms and their interactions with the environment. Major themes include cell structure and specialization, energy and chemistry of life, genetics and evolution, diversity of life and ecology. Enrollment in the course is determined by placement test scores and/or teacher recommendation. This is a freshman or sophomore level course.

-Entrance as a freshman is based on a placement test and recommendation

ANATOMY AND PHYSIOLOGY (one year; one credit; grades 11-12): In this laboratory course students will cover the basics of anatomy and physiology. Given the nature of the course, labs will focus on dissection of several organisms all of which students are required to participate in. Dissection labs will provide students with an opportunity to explore and investigate the structure and physiological functioning of the various organ systems found in mammals including: integumentary, muscular, skeletal, cardiovascular, respiratory, digestive, excretory, nervous, endocrine, lymphatic and reproductive systems.

-Prerequisite: Biology or Biology Honors and Chemistry or Chemistry Honors

-Minimum number of students - 6.

-Course offering dependent on scheduling availability.

AP BIOLOGY (one year; one credit; grades 11-12): This year-long course requires all students to participate in the Advanced Placement exam in May. We examine in depth biological concepts and topics covered within four essential ideas: (1) the process of evolution drives diversity and unity of life; (2) biological systems utilize energy and macromolecules to grow, reproduce, and maintain homeostasis; (3) living systems store, retrieve, transmit and respond to information essential to life processes; and (4) biological systems interact and are interdependent with one another.

-Prerequisite: Students must have an overall GPA of at least 3.0 and a B or higher in all prior science courses.

-Students must have completed Biology or Biology Honors, Algebra I & Chemistry or Chemistry Honors before enrolling this course.

-Teacher recommendation is required.

-Minimum number of students-3

Chemistry (one year; one credit; grades 10-11): Chemistry is an inquiry based, problem solving, laboratory course that examines matter and the changes it undergoes. Topics covered include measurement, atomic structure, chemical composition, periodicity, chemical quantities, electron configurations, chemical quantities, bonding, gas laws, equilibrium, acids and bases and oxidation-reduction reactions. Special emphasis is placed on chemistry in our daily lives through journal writing.

-Prerequisites: Algebra I and Biology

Chemistry Honors (one year; one credit; grades 10-12): Chemistry Honors is an advanced comprehensive inquiry-based laboratory course investigating the composition of matter and the changes it undergoes. Due to the heavy math component, faster pace, and advanced depth of study, the Chemistry Honors course is geared toward preparation of chemistry at the college level, hence is intended for students who excel in algebra and analytical problem-solving and possess a strong interest in chemistry. The topics to be studied include the makeup of matter, atomic structure, bonding, periodicity, formulas, chemical equations, stoichiometry, gasses, acid-base theory, solutions, thermochemistry, and equilibrium. Laboratory experiments and computer simulations complement theory while emphasizing safety and science writing skills. Project work and additional readings round out this intensive course of scientific study.

-Prerequisites: A 3.0 grade average in all previous math and science courses, including Algebra I and Biology

-Teacher recommendation is required.

AP CHEMISTRY (one year; one credit): This course is designed to be the equivalent of the general chemistry course usually taken during the first college year. This is an academic, quantitative chemistry course that covers atoms and molecules and how they interact according to physical laws. Such study is applicable to everyday life: this concept will be demonstrated repeatedly throughout the year. Topics of study include the structure of matter, chemical reactions, descriptive chemistry, and chemical calculations. The laboratory plays an integral role in this course. Students are required to take the AP Chemistry exam.

-Prerequisite: A 3.0 grade average in Chemistry I, Chemistry II Honors, Physics I and Algebra II.

-Minimum number of students 3.

-Course offering dependent on scheduling availability

Organic Chemistry (one semester course; one-half credit; Grades 11-12): This one semester course is designed to provide a fundamental overview of organic (carbon) chemistry to students interested in pursuing a career in the sciences, pre-medical, dental, veterinary, nursing and pharmacy. Upon completion of this class, students would understand the relationship between structures and functions of molecules, the major classes of reactions, reaction energetics and mechanisms, synthesis of organic compounds and how to determine structure via spectroscopic lab techniques.

-Prerequisites: A 3.0 grade average in Chemistry or Chemistry Honors

-Teacher recommendation is required

EARTH SCIENCE I (one-half credit; grades 11-12): This is a semester course focusing on the geology of the earth, including its materials, processes, structure and changes. A high school level text is the basic reference with class discussion and laboratory work to help in concept understanding. A field trip to see local geological features may be included.

-Prerequisite: Biology/Biology Honors

-Minimum number of students 3.

EARTH SCIENCE II (one-half credit; grades 11-12): This semester course uses a high school level textbook to examine the Earth's oceans and atmosphere and their influence on each other and our planet's surface. Topics in astronomy may also be covered. Class discussion, laboratory work and supplemental research will aid in understanding of concepts.

-Prerequisite: Biology/Biology Honors

-Minimum number of students 3.

CONCEPTUAL PHYSICS (one credit, grades 10-12): This year-long laboratory course is intended to give an overview of the four main areas of physics for non-science focused students. Although relationships of quantities such as force and energy will be examined in discussions, demonstrations and laboratory investigations, mathematical calculation will be kept to a minimum.

-Prerequisite: Biology, Algebra I

PHYSICS HONORS (one credit; grades 11-12): This year-long laboratory course is at the level of High School Physics expected by colleges. It covers basic concepts in the main areas of physics: mechanics, thermal physics, wave motion and electricity. Concepts will be examined by class demonstrations and discussions, laboratory investigations, and mathematical application of equation relationships.

-Prerequisites: 2.5 grade average in previous Science and Math classes.

-Past or current enrollment in Algebra II, Chemistry recommended.

AP PHYSICS 1 (one credit; grades 11-12): This is a year-long college level laboratory course for science oriented students. This algebra-based course focus includes Newtonian mechanics, work, energy and power, rotational and periodic motion, and static electricity. Students will be expected to take the AP Physics 1 Exam. A score of 3, 4, or 5 on the Exam may earn one semester of college credit.

-Prerequisites: 3.0 grade average in previous Science and Math classes; including Geometry, past or current enrollment in Algebra II, Pre-Calculus or Calculus

-Minimum number of students 3.

-Teacher recommendation is required.

-Course offering depends on scheduling availability

AP PHYSICS 2 (one credit; grade 12): This is a year-long college level laboratory course for science oriented students. The algebra-based course includes concepts of fluid mechanics, electricity and magnetism, sound, optics, nuclear physics and quantum mechanics. Students will be expected to take the AP Physics 2 Exam. A score of 3, 4, or 5 on the Exam may earn one semester of college credit.

-Prerequisites: 3.0 grade point average in Physics Honors or AP Physics 1; 3.0 grade average in Chemistry, Geometry and Algebra II; past or current enrollment in Pre-calculus or Calculus.

-Minimum number of students 3.

-Teacher recommendation required.

-Course offering depends on scheduling availability

Ohio's Natural Science (one-half credit; grades 10-12): This laboratory science course covers the happenings within the natural world right outside our doors. Topics of study include Ohio's geologic history, plants and forests, insects, and macroinvertebrates, watersheds, herpetology, ornithology, and mammalogy. This class frequently ventures outside in appropriate weather.

-Prerequisites: Biology or Biology Honors

Introduction to Engineering (one-half credit; grades 11-12): This is a semester-long projects based course introducing students to the various fields of engineering and the processes involved in designing a solution to a problem. Various methods of design, model building, and results testing will be part of the hands-on course. Students need both a good basic knowledge of physics and math, as well as being able to tap into some creativity and practicality.

-Prerequisite: A 2.5 grade average or better in previous science and math courses, including Geometry.

SCIENCE DEPARTMENT REQUIREMENTS

Required Courses

Biology -or- Biology Honors
+Plus two more credits in
Lab sciences*

Electives

Anatomy & Physiology [one credit]
AP Biology
Chemistry
Chemistry Honors
AP Chemistry
Earth Science I [one-half credit]
Earth Science II [one-half credit]
Conceptual Physics
Physics Honors
AP Physics 1
AP Physics 2
Ohio's Natural Science [one-half credit]
Forensic Science [one-half credit]
Introduction to Engineering [one-half credit]
*All of the above courses are lab sciences

SOCIAL STUDIES DEPARTMENT

Social Studies is concerned with humankind. Its scope is the human struggle to survive, to master the environment, to establish a meaningful social order, to develop its potential, and to plot its future.

A person's involvement in the human community is essential if one is to become a responsible functioning person. It is the community which has built civilization, resolved conflicts, protected life, worshiped God, and ventured into space. And it will be only the community which halts destruction, and eradicates pain and want.

People are components in a system. They act upon the system and are acted upon by the system whose vitality is related to the health and its members. Failure of the system to respond and interact will lead to chaos.

Social Studies does not offer ready answers, but does address issues, asks questions, and searches for solutions.

World History and Geography Foundations: College Prep (one credit, grade 9): This is a full year course offered to students in the 9th grade. The course is divided into two distinct phases. The first phase focuses on World History starting with the Scientific Revolution in the 1600's and ending in modern times. While Europe is a focal point, students will explore Europe's influence on countries and peoples around the world. Students will be expected to analyze primary/secondary sources, and engage in introductory historical, reading/writing/analysis. The second phase of the class consists of an academic quarter being devoted to geography foundations. Students will be enhancing basic geography skills including, but not limited to: reading and understanding different types of maps, creating maps/information charts, learning locations and capitals of countries around the world, examining natural resources (location, quantity, economic, and social impact), physical features, and weather/natural disasters.

-This is a required course

World History and Geography Foundations: Honors (one credit, grade 9): The basic content and phases of this course is the same as the College Prep version. However the activities within the class are geared towards tapping into students' passion for history and preparation for future AP/college level classes. Students engage in extensive opportunities to: read and analyze of primary/secondary sources, enhance historical research and writing skills, and engage in collaborative learning activities.

-Teacher recommendation required

AMERICA IN THE MODERN WORLD - 1877 to the present (one credit; grade 10): This course traces the political development in the history of the republic. It chronicles the consequences of establishment and expanse of the frontier, the development of industrial and technological skills, while it measures their merit and human cost. The course focuses on women's contributions to American growth, analyzes the commitment of its sons and daughters to global issues and questions the nature and wisdom of future commitment to the global community.

ADVANCED PLACEMENT UNITED STATES HISTORY (one credit; grade 11): Structured for students who have the motivation and capability of doing advanced work, this course will, through college readings, develop a better understanding of the history of the United States in political, economic, social, and cultural terms. It will improve writing research and critical reading skills. The AP course will further develop the ability to analyze historical arguments and documents.

-Prerequisite: Teacher recommendations, all students are required to take AP Exam.

-Minimum number of students – 6

GLOBAL STUDIES (one-half credit; grades 11 - 12): This is a semester course designed to engage students in a thematic approach to research and discussion of cause and effect relationships among present-day non-western nations. Students will utilize such techniques as discussion, analysis and synthesis to develop an understanding of the ways in which global interdependence has affected various social issues including the distribution of natural resources, movements of population, emergence of competing political philosophies, and tension and conflict within and among differing ethnic and cultural interests.

-This course is required, schedule permitting.

US GOVERNMENT PROCESS (one-half credit; grades 11-12): In this semester course, basic approaches to government are compared and contrasted. Concepts which shaped American government are examined. Study of the Constitution is undertaken with emphasis on the Bill of Rights. It is important for students to understand the three branches of government and their interdependence. Students will attain a grasp of foreign relations as well as current foreign and domestic issues which are shaping the future.

-This is a required course.

AP MODERN WORLD HISTORY (1200- Present): (one credit; grades 10 & 12): Through extensive reading/analysis of primary source documents, interpretative and critical resources, class discussion and lecture, students are led toward a greater understanding of global interactions throughout modern world history. Topics include, but not limited to: expansion/development in Asia, Africa, and Americas, global trade through the use of the Silk Road and open sea travel, political and cultural revolutions, global imperialism, world wars, and modern-day globalization. Note-taking skills, critical thinking and interpretation, and essay-writing skills are stressed in preparation for taking the College Board

-All students are required to take AP Exam

-Prerequisite: Teacher recommendations (English and History)

ECONOMICS (one-half credit; grade 12): This is a semester course designed to engage students in the study of both macro and micro economics. Students will analyze factors affecting the economy such as government interaction, world events and personal choice. An analysis of current economic events through the use of current media will supplement the text, class discussion and guest lectures.

-Minimum number of students – 6

AP US AND COMPARATIVE GOVERNMENT (one credit; grade 12): This course is designed to prepare students for success on the AP exams in both United States Government and Comparative Government. The first semester of the course will focus on Comparative Government while the second will focus on US Government. The AP course in Comparative Politics is designed to introduce students to the fundamental concepts used to study the processes and outcomes of politics in various nations throughout the world. The AP course in the United States Government and Politics is designed to give students an analytical perspective on government and politics in the United States.

-Students must have a teacher recommendation for this class, maintain a “C” average to remain in the course and are required to take 2 AP exams.

INTRODUCTION TO PSYCHOLOGY (one-half credit; grades 11-12): This is a semester course designed as an elective for junior or senior year. The Introduction to Psychology course attempts to mirror a college level

PSY 101 in terms of content covered. Its focus is to examine human behavior and mental processes while exploring the following topics: history of psychology, psychological perspectives, sensation, perception, learning, memory, personality, disorders and development. Students should expect to read from the textbook, journal/news articles, watch video clips, and engage in class discussions/activities to highlight how psychology provides insight into understanding our thought processes, learning, behavior and motivation.

FACING HISTORY AND OURSELVES (one-half credit; grades 11-12): This course focuses on developing and reinforcing a working understanding of the U.S. system of government and teaches, reinforces or extends a variety of skills central to citizenship in a democracy. *Choices in Little Rock*, the efforts to desegregate Central High School in Little Rock, Arkansas in 1957 are the focus of the semester course. The unit explores civic choices - the decisions people make as citizens in a democracy. A related topic may include *Holocaust and Behavior*.

SOCIAL STUDIES DEPARTMENT REQUIREMENTS

Required Courses

- World History
- America in the Modern World
- or-**
- A.P. US History
- US Government [one-half credit]
- or-**
- AP US Government [1 credit]
- or-**
- Global Studies [one-half credit]

Electives

- AP World History
- Economics [one-half credit]
- Intro to Psychology [one-half credit]

- Facing History and Ourselves [one-half credit]

Criteria for placement in AP history classes

1. Teacher Recommendation, both Social Studies and English
2. Superior writing and research in history and history skills
- 3.

Criteria for remaining in AP history classes

1. Maintain a C average
2. Continuing commitment

VISUAL AND PERFORMING ARTS DEPARTMENT

The Arts Program is concerned with artistic expression and response that contributes to visual-aesthetic-aural literacy. By investigating the historical, cultural, social and religious context of art and music, students arrive at an expanded understanding of who they are. Through personal expression student and artist communicates a truth that is both personal and universal. Responding to works of art and music, listening to artist's words and works and critics' comments help students discuss and value the arts. The course of study is designed to elicit both expression and response in the visual and performing arts. The purpose and function of the course of study is to provide a sequential plan of instruction that is specific, structured and flexible to accommodate the creative process.

VISUAL ARTS

ART I (one-half credit; grades 9-12): An introductory course for the student to develop a presentation in art, grounded in artistic merit within historical, social, cultural, critical and aesthetic parameters. Emphasis on experimentation with a variety of media to develop problem-solving skills in the creation of art forms.

ART II (one-half credit; grades 10-12): A more in-depth study in the exploration, experimentation and development of art using a wide range of art media. Emphasis on a body of work in terms of existing and recurring ideological themes, images, symbols, and styles.

-Prerequisite: Art I

CERAMICS I (one-half credit; grades 10-12): An opportunity for creative expression and to learn three basic hand-building techniques and sculpting. Students are given projects which allow them to create useful projects while meeting the rubric requirements. Those who desire will have the opportunity to use the potter's wheel.

-None

CERAMICS II (one-half credit; grades 10-12): Ceramics II provides the opportunity to develop a theme, which is then explored through the creation of projects surrounding that theme. Other areas of study include principles and techniques of decoration and glazing methods.

-Prerequisite: Ceramics

INDEPENDENT STUDY (one-half credit; grades 10-12): This course is for the serious art student who desires to pursue a personal line of investigation or to build her personal portfolio. The scope and design of the course will be determined by the student and the instructor. The student will create a theme for the semester, and then create projects that are based on that particular theme.

-Prerequisite: Art I

PHOTOGRAPHY (one-half credit; grades 10-12): An introductory course in both film and digital techniques. Photography will be explored as a medium for expression, discovery and communication. Students will learn to use a film camera, as well as a black and white photography darkroom to create prints. They will also study composition, lighting, and stop-motion photography, and create their own working cameras. Needed materials: a digital camera or phone with digital camera and a shoe box.

-Prerequisite: Art I

RELIGIOUS THEMES IN ART (one-half credit; grades 10-12): An art history course that explores the treasury of Catholic art. Topics that will be covered include the history of religious icons, sculptures, ceramic pieces, and paintings, as well as techniques used by particular artists. Students will not only study art pieces, but will create art as well throughout the course.

-Prerequisite: Art I

PERFORMING ARTS

MIDDLE SCHOOL CHORUS: All 6th, 7th and 8th grade students are part of the choral program at Our Lady of the Elms. Chorus students will develop their part-singing abilities as well as their vocal technique. Students are introduced to basic music theory which is incorporated in the study of each piece to be performed. Students are also introduced to the different periods of music history, as it relates to the choral repertoire they are preparing.

The Middle school Chorus presents 2 concerts a year, the Holiday program and the Spring program in May; these concerts are mandatory and constitute 60% of the students grade.

CHAMBER SINGERS (one credit): The Chamber Choir at Our Lady of the Elms is open to students in grades 9-12. Chamber Choir students sing a variety of musical styles from the various periods of music history including Broadway and popular music. Chorus members will continue to strengthen their part-singing abilities and vocal technique. The students will be tested on music theory, musical style, and the various periods of music history.

The Chamber Choir give 3 concerts a year-Fall, Winter and Spring, which are mandatory and constitute 60% of their grade. The Chamber Choir is also called upon to perform at school Masses, Baccalaureate, Commencement and various community functions.

Anyone wishing to participate in the Chamber Choir should request an audition with the choir director.
-Upon selection you will be enrolled based on availability.

THE ENCORES (one credit): The Encores Show Choir is open to students in grades 9-12. Participants in this group develop their part-singing abilities, vocal technique, and enhance their musical performance with dance choreography. Students will be tested on music theory and musical style as it relates to their performance. The Encores Show Choir present 3 concerts a year-Fall, the Holiday program in December, and May. These concerts constitute 60% of the student's grade and attendance is mandatory.

Anyone wishing to participate in the Encores Show Choir should request an audition with the choir. --
-You will be enrolled based on availability.

SPEECH (see pg. 14) may be used as Performing Arts credit.

WORLD LANGUAGES DEPARTMENT

The World Languages Department of Our Lady of the Elms High School strives to empower students linguistically and culturally to participate in the diverse, multilingual market places of today's global community.

The members of the World Languages Department strongly endorse the standards developed by the National Standards in Foreign Language Education Project, which is a collaborative effort of the American Council on the Teaching of Foreign Languages, American Association of Teachers of French, American Association of Teachers of Spanish, and American Association of Teachers of Latin. Under these standards, students will realize the following objectives:

Communicate in languages other than English and develop written and spoken expression in the target languages in a variety of settings and contexts.

Demonstrate knowledge and understanding of other cultures including an understanding of the values, practices, perspectives and products within target cultures.

Connect with other disciplines and acquire Information recognizing the distinctive viewpoint only available through foreign languages and cultures

Develop Insight into the nature of language and culture through comparison of the language and culture studied and their own native language and culture

Participate in multilingual communities at home and around the world using foreign languages within the school setting, as well as for personal enjoyment and enrichment.

FRENCH I (one credit; grades 8- 12): This course introduces the student to the fundamentals of the French language and culture. Skills of listening, speaking, reading and writing will be practiced in the target language. There is a strong emphasis on speaking in the target language. Grammar and culture will be presented through the utilization of CDs, videos, lectures, songs, games, as well as the internet.

FRENCH II (one credit; grades 9-12): The student will review the basic concepts from French I. This course emphasizes the development of a strong grammatical foundation. Daily speaking ability will be developed and practiced. The student will continue to speak in the target language on a variety of subjects to increase vocabulary. Furthermore, the student will continue her active exploration of Francophone culture through Internet research, games, videos, CD's, songs and other media in the target language.

-Prerequisite: C in French I

FRENCH III (one credit; grades 10-12): FRENCH III (one credit; grades 10-12): This course reviews grammar from French I and II, and introduces new verb tenses and more complex grammar structures for students to increase their reading, writing and verbal comprehension and fluency. Students will expand their cultural awareness and appreciation of Francophone culture through class discussion, reading authentic material, Internet research, presentations and watching newscasts, documentaries and film, all in the target language.

-Prerequisite: C in French II

FRENCH IV (one credit; grades 11-12): The class will be conducted in the target language as appropriate. Various works by Francophone authors will be read, discussed and analyzed. Oral emphasis will engage students daily. Grammar points will be reviewed using in-class exercises and writing assignments. French media (news, films, shows) will be shown and discussed. Students will learn about various Francophone countries and cultures, and they will present information through various projects. A variety of ancillary materials will be used to enrich the class. -Prerequisite: A or B in French III -Minimum number of students - 6

-Prerequisite: A or B in French III

-Minimum number of students – 6

FRENCH V (one credit, grades 11-12) Students will learn advanced grammar structures and will increase their verbal fluency and written skills through discussion and writing prompts. Internet websites and authentic videos will aid in language comprehension and cultural knowledge. The class is conducted in French and students are required to communicate in the target language.

-This course will be offered depending on student and teacher availability.

LATIN I: (one credit; grades 8 -12): In this course, students will be introduced to basic Latin grammar, vocabulary, expressions and commands. Students will translate a variety of passages, answer comprehension questions, and learn how to compose simple sentences in Latin. English derivatives, stemming from Latin, will be emphasized. A glimpse into the lifestyle of the Romans, their contributions, and mythology will be provided. Studying Latin increases a student's vocabulary, polishes English grammar skills, and serves as a firm foundation for the acquisition of other languages. It is excellent in teaching analytical, processing, and application skills, for it requires great attention to detail. Latin is a classical academic non-spoken language that best suits a motivated student.

-Prerequisite: Recommendation of an English teacher.

LATIN II: (one credit; grades 9 -12): In Latin II, students learn more advanced grammatical forms and vocabulary as translation and composition skills continue to be honed. Students will explore, in more depth, Greek and Roman myths through the reading of Edith Hamilton's Mythology and become better acquainted with the history and culture of the Romans by means of translations, research, projects, and enrichment activities.

-Prerequisite: C in Latin I

LATIN III & IV: (one credit; grades 10 -12): Third and fourth year grammar features the Subjunctive Mood along with the continuation of Latin grammar and vocabulary. Students will concentrate on translating and interpreting the works of renowned Roman authors. In this course, during alternate years, students are exposed to the different periods of Latin literature, a variety of writers and their works such as Cicero, Caesar, Pliny, Plautus, Lucretius, Ovid, Catullus, Phaedrus, Horace, and Vergil. Such readings are placed within their cultural and historical context and prove most beneficial to the college bound student.

-Prerequisite: A or B in Latin II and III

SPANISH I (one credit; grades 8-12): The student will cultivate the four basic skills of listening, speaking, reading and writing in the target language. She will also develop an understanding of the basic grammatical structures and comprehension of the target language, whether spoken or written on a level commensurate with experience. The student will develop an awareness and appreciation of the Hispanic culture through a variety of means, including video, music, art, student presentations and food. Students will use the internet to broaden their cultural knowledge and enhance their language skills.

SPANISH II (one credit; grades 9-12): Students will strengthen their comprehension and fluency in the areas of speaking, writing, reading and listening. Communicative skills, in verbal and written form, will be enhanced. Students will use the internet to enhance their language skills and to expand their cultural awareness and appreciation.

-Prerequisite: C or above in Spanish I.

SPANISH III (one credit; grades 10-12): This course develops advanced grammar and vocabulary applications. Course assignments will strengthen comprehension, speaking, listening and writing skills. Conversational skills will be practiced through meaningful communicative activities. Textbook CDs will be used to reinforce understanding of native Spanish speakers. Students will refine their language skills and cultural enhancement through internet web sites.

-Prerequisite: C or above in Spanish II

Spanish IV (one credit; grades 11-12): This course integrates interdisciplinary subjects as part of the overall task of achieving fluency in the target language. Extemporaneous speaking, pronunciation skills and listening skills will be refined through many verbal/audio exercises. Students will sharpen their writing skills through various assignments. A comprehensive review of basic and advanced grammar concepts will be integrated throughout the course. Internet websites will be used to enhance the students' language acquisition and cultural awareness. Students will read selected materials in the target language to elicit an understanding of the various cultures of Spain and Latin America and to grasp advanced grammatical concepts in context.

- Prerequisite: A or B in Spanish III

-Minimum number of students – 6

Spanish V (one credit; grades 11-12): Students will read selected literary works and increase verbal fluency and written skills through discussion and writing prompts. The internet will help to enhance language comprehension and cultural knowledge as well as film, music, and art. The class is conducted in Spanish and students are required to communicate in the target language. Grammatical structures are reviewed and new concepts are practiced in oral and written form.

-Prerequisite: A or B in Spanish IV

-This course will be offered depending on student and teacher availability.

OTHER EDUCATIONAL OPPORTUNITIES

STUDY SKILLS/INFORMATION MANAGEMENT; grade 9): This course is designed to evaluate, develop and reinforce study skills and to develop the critical thinking skills necessary to effectively use information. The course is non-traditional in that it is integrated into orientation and freshman homeroom during first semester. Students will participate in learning activities to increase their ability to use analytical reasoning and critical thinking across the curriculum and in their Internet research. -

-Students submit documentation of learning activities to earn a pass/fail grade and ½ credit.

CURRENT AND EMERGING TECHNOLOGIES (one-half credit; grades 11-12): This course is a one semester upper-level elective seminar intended to help students move beyond passive interaction with technology and into active creation, personal expression, and effective communication using technology. The seminar will help students begin to develop an awareness and understanding of current and emerging trends in technology, engineering, and design while exercising systematic reasoning, problem solving, and collaboration.

-Maximum number of students - 10

SUMMARY OF ELECTIVES

<u>Course</u>	<u>Grade Level</u>	<u>Semester or Year</u>
<u>ENGLISH</u>		
Advanced Speech [Forensics Practicum]	11, 12	Semester
Grammar and Composition	10, 11, 12	Semester
Speech	9, 10, 11, 12	Semester
Introduction to Film History	11, 12	Semester
<u>VISUAL AND PERFORMING ARTS</u>		
Art I *	9, 10, 11, 12	Semester
Art II	10, 11, 12	Semester
Ceramics I	10, 11, 12	Semester
Ceramics II	10, 11, 12	Semester
Independent Study in Art	10, 11, 12	Semester
Photography	11, 12	Semester
World Cultures Through Art	9, 10, 11, 12	Semester
AP Art	12	Semester
*Prerequisites for all Art Electives		
Middle School Chorus	6,7,8	Year
Chamber Singers	9, 10, 11, 12	Year
Encores	9, 10, 11, 12	Year
<u>WORLD LANGUAGES</u>		
French I / Spanish I / Latin I	9, 10, 11, 12	Year
French II / Spanish II / Latin II	9, 10, 11, 12	Year
French III / Spanish III / Latin III	10, 11, 12	Year
French IV / Spanish IV / Latin IV	11, 12	Year
<u>MATHEMATICS</u>		
-Algebra II / Trigonometry Honors	9, 10, 11	Year
-Probability - Statistics	10, 11, 12	Year
-Pre-calculus	11, 12	Year
-AP Calculus	11,12	Year
-AP Statistics	11,12	Year
<u>PHYSICAL EDUCATION</u>		
Physical Education*	9, 10, 11, 12	Semester [<i>¼ credit</i>]
<i>*½ credit required, ¼ credit must be earned at Our Lady of the Elms</i>		
<u>SCIENCE</u>		
Anatomy & Physiology	11, 12	Year
AP Biology	12	Year
Chemistry	10, 11	Year
Chemistry Honors	10, 11	Year
AP Chemistry	12	Year
Earth Science I	10, 11, 12	Semester

Earth Science II	10, 11, 12	Semester
Physics	10, 11, 12	Year
AP Physics 1	12	Year
AP Physics 2	12	Year
Forensics	11, 12	Semester
Ohio's Natural Science	10, 11, 12	Semester
Introduction to Engineering	11, 12	Semester
Organic Chemistry	11, 12	Semester

SOCIAL STUDIES

AP Modern World History	10,12	Year
AP US History	11	Year
AP US Government	12	Year
Economics	11, 12	Semester
Global Studies (Required, schedule permitting)	11, 12	Semester
Introduction to Psychology	11, 12	Semester
Facing History and Ourselves	11, 12	Semester

Leadership	9, 10, 11, 12	Year
Study Skills / Information Management	9	Semester
Current and Emerging Technologies	11, 12	Semester
